BADU® Logic 2

Additional filter pump control and running time optimization including two temperature sensors.

Details

Class: GREEN
Extras: Poolwassererwärmung
Pool equipment: Control units

Field of application

The new pool controllers regulate the filter times as well as the heating and solar heating of swimming pool water fully automatically whilst you relax and enjoy an ideal water temperature.

Miscellaneous

The new pool controllers regulate the filter times as well as the heating and solar heating of swimming pool water fully automatically whilst you relax and enjoy an ideal water temperature.

Depending on the type, the controller regulates further fundamental parameters of your unit.
– Simple installation and fast troubleshooting thanks to installation assistant and help menu.
– Easily understandable full text display and multi-lingual menu.
– Clear graphic display of the swimming pool system.
– Usage display and efficiency testing with optimal third temperature sensor.
– With the BADU Logic 3 the unit can be monitored on smartphones or tablets via an optional webmanager and various parameters can be regulated.
