The feeling of boundless expanse ...

BADU JET Turbo Pro

INNOVATIVE

The innovative propeller technology generates an even, soft flow and thus enables a particularly natural swimming experience. Due to the hermetic separation of the electronic components and the pool water, no tension reaches the pool and the unit is particularly safe.

INTELLIGENT

The specific performance regulation up to max. 350 m³/h allows a high-end swimming experience perfect for a professional workout, relaxation, rehabilitation training or simply fun. The installation of the unit is uncomplicated.

INDIVIDUAL

There are two individual designs in the best material quality available to choose from. The individual look fits harmoniously into exclusive pool worlds and completes and supports the planned room concept down to the finest detail.

... easily convertible

PROFESSIONAL WORKOUT

Performance oriented training on the limit, effective and focused, with high water performance. The performance can be adjusted specifically thanks to sensor keys or via remote control.

RELAXATION

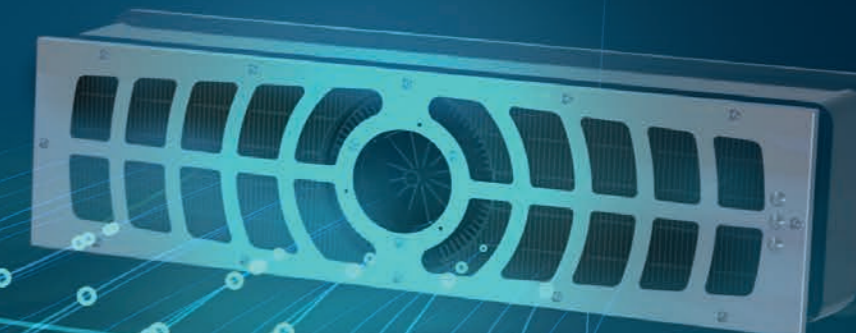

The soft and even flow is optimal for relaxing after a long day at work and forgetting the stress of everyday life.

REHABILITATION TRAINING

Thanks to sophisticated technology, individual body parts are not continuously under strain. Perfect for rehabilitation in the form of movement therapy or preventative mobility support.

FUN

The ultimate and safe swimming fun for all the family – thanks to the TÜV* approved safety seal and compliance to relevant safety norms.

*TÜV/GS seal pending approval.
