EDITORIAL

Dear customers, business partners and friends of SPECK Pumps,

An eventful year is drawing to a close. We have struggled with fears, gained new hope and learned to appreciate many things we took for granted. We have adjusted to completely new situations which we never dreamed possible.

What remains after such an eventful year is gratitude. For the fact that we have all stayed healthy in these times. For keeping your word. And thankfulness for the fact that cohesion has grown stronger in this crisis and that we have mastered the challenges together.

Our thanks go to you, dear customers and business partners. It is only with you that we were able to achieve a historic growth in turnover in 2020. And to our reliable employees! Thanks to them we have achieved the goals that were set for us, even under these most unusual circumstances.

During the Christmas season and at the turn of the year, contact restrictions are a bitter pill to swallow. I hope that we can all focus on the essentials, spend some peaceful days and regain our strength ready for all that the New Year may bring.

Photo: Tanja Bolte

We at SPECK Pumps look confidently into the future and hope for better times in which personal contacts, which are a matter of the heart for us, will again take place in all friendship and closeness.

I wish you and your family a contemplative, relaxing and hopefully happy Christmas season. All the best, good luck and joy in the New Year. Stay healthy!

Your Armin Herger

Managing Director
SPECK Pumpen Verkaufsgesellschaft GmbH

Domestic & Industrial technology 2021

Our innovations in the catalogue for 2021.

Just finished, our new catalogue for domestic and industrial technology is now available. Our innovations 2021 summarised for you:

Reliable drinking water separation made easy ...

Our new user-friendly drinking water separation stations can be found from page 30 onwards:

- > NTA Comfort: simple and convenient
- > NTA Compact: the flexible
- > NTA Premium: the luxury version

Optimum supply of wall hydrants...

Our extended fire extinguishing system series can be found from page 40 onwards:

- > The single-pump or multi-pump systems of the Feuerzell II - Multicell II series have been supplemented by further pump types for a more precise selection.

Smart garden water supply ...

Our cistern pumps type Zismatic can be found from page 172 onwards:

- > The new Zismatic 40/08 complements the Zismatic 40/10 by a further type. Both pumps are supplied including diaphragm pressure vessel. The integrated control unit in the pump head ensures problem-free connection on site.

Fast delivery from stock

Fast reaction is no problem for us! The following products are in stock and available for immediate delivery:

- > Aquacell AE-M . Pressure boosting system from stock . page 6
- > IN-VB 2 to IN-VB 15 . Vertical centrifugal pumps from stock . from page 52
- > SUPS . Submersible pumps up to 30 stages from stock . from page 114

SPECKMAT 2 THE BIG BROTHER OF SPECKMAT 1 IS HERE.

The big brother of SPECKMAT 1 is here.

The switchgear for controlling pumps.

No matter whether underwater pumps, cistern pumps or jet pumps - with Speckmat 2 you can control all of them up to max. 2.20 kW, 230 V and protect them from running dry.

Speckmat 2 automatically switches the pump on and off: If the line pressure drops to the set value of 3 bar, e.g. by opening a water tap, the pump is switched on. If the flow in the line stops by closing the water tap, the pump is switched off again. If no more water flows through the Speckmat 2 when there is a lack of water, the pump is protected from running dry by switching it off. In addition, a fault LED lights up.

Speckmat 2 can be used up to a max. pressure of 12 bar and media temperatures up to 60°C. The switch-on pressure is 3.0 bar. Thanks to a stainless steel non-return valve, the switchgear can be used in many ways. Corrosion has no chance. Speckmat 2 is available from stock.

NEW APPRENTICES

Start of training

Welcome to working life.

First of September 2020, we welcomed five young people to the company who are taking their first steps into working life with an apprenticeship. We wish them an interesting and varied time at SPECK Pumps, during which we will accompany them intensively. Our common goal: competent junior staff and a common future perspective.

- > **Karolin DreBendörfer**
Trainee industrial business management
- > **Jonas Hutzler**
Trainee industrial business management
- > **Lisa Leuthner**
Trainee industrial business management
- > **Alessandro Penning**
Trainee warehouse clerk
- > **Alexander Riese**
Apprentice mechatronics engineer

Welcome: Jonas Hutzler, Karolin DreBendörfer, Alessandro Penning, Lisa Leuthner, Alexander Riese and HR Manager Stefan Dörr (from left to right).

Team-News

Nine new recruits and five trained junior staff.

Aron Endres.

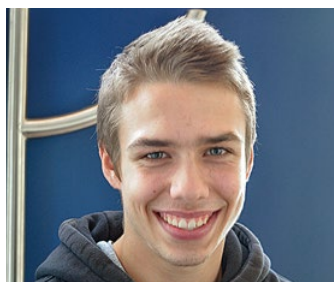

Elias Fink.

Maximilian Krauß.

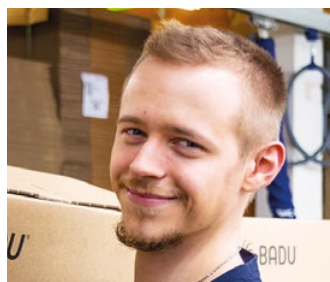

Jonas Reißberger, Daniel Simpson (below).

Patrick Bärenz.

Alexander Bauer.

Michael Brückner.

Christian Barth.

Julia Bickel.

Thomas Hartmann.

Helmut Hopfengärtner.

Laura Hüllmantel, Florian Ziegler (below).

Our SPECK team has continued to grow over the past few months. We welcome nine new colleagues. And we are pleased that we were able to offer four former trainees industrial clerks future prospects in the company.

Hired:

- > Patrick Bärenz . Operation planing
- > Christian Barth . BADU production
- > Alexander Bauer . IT Departement
- > Julia Bickel . Online Marketing
- > Michael Brückner . Warehouse
- > Thomas Hartmann . BADU production
- > Helmut Hopfengärtner . Warehouse/Logistics
- > Laura Hüllmantel . Assistance to the management/online marketing
- > Florian Ziegler . Plastics department

Taken on:

- > Aron Endres . Dispatch
- > Elias Fink . Sales domestic
- > Maximilian Krauß . IT departement
- > Jonas Reißberger . Branch office Neunkirchen
- > Daniel Simpson . Warehouse

ANNIVERSARIES

Stefan Funk.

Martina Klinger.

Andreas Rohrmüller.

Marcel Schmidt.

Tanja Krejci.

Christian Neuzil.

Christian Zeitz.

Max Klein.

Andreas Politaj.

Pitor Tytko.

With nine times 10 years of service, four times 25 years and once even 40 years of service as well as five 50th and 60th birthdays each, we would have had many good reasons to celebrate this year. Unfortunately, an anniversary celebration, which has a long tradition in our company, was not possible in the current situation. A group picture with current distance control - unthinkable. Nevertheless, we are proud of the commitment of our employees, some of whom have been with us for decades, and of their fidelity and loyalty to SPECK Pumpen!

24 good reasons to cheer

14 company anniversaries and 10 round birthdays.

Many thanks for...

... 10 years of service:

- > Stefan Funk . Sales of domestic and industrial technology
- > Martina Klinger . Branch office Rodgau
- > Tanja Krejci . Branch office Stuttgart
- > Christian Neuzil . BADU production
- > Christian Penkwitz . Operation planing
- > Andreas Rohrmüller . Branch office Munich
- > Marcel Schmidt . BADU production
- > Christian Zeitz . Technical office
- > Max Klein . Operation planing

... 25 years of service:

- > Taylan Aksu . Warehouse, Logistics
- > Andreas Politaj . Sales of domestic and industrial technology
- > Pitor Tytko . Plastics Departement
- > Gerd Wild . Warehouse

... 40 years of service:

- > Werner Gottschalk . Warehouse

Congratulations on the ...

... 50th birthday:

- > Radu Crimu . Warehouse
- > Johannes Kohlmann . Electrical Departement
- > Arnold Koprek . Branch office Stuttgart
- > Eva Watolla . Master data
- > Sebastian Watolla . Technical Office

... 60th birthday:

- > Horst Beck . BADU production
- > Zdzislaw Figiela . Exhibition stand construction/Warehouse
- > Werner Gottschalk . Warehouse
- > Matthias Hannapp . Plant engineering
- > Ralph Thiele . Branch office Munich

Gerd Wild, Werner Gottschalk (below).

NEW CIRCULATION PUMP

BADU Eco Flex

From the BADU GREEN range: Highly efficient adjustable circulation pump with the latest motor technology. And well-known control for large pools.

The block pump with integrated strainer basket for swimming pool water circulation in filter systems was developed as a replacement pump for BADU Eco Motion. Simple operation, functional principle like BADU Eco VS, constant power control in % and speed control in min^{-1} .

The BADU Eco Flex with its motor concept is an energy-conscious circulation pump for large pools. In the private and public sector it can be ideally used for pools with a size of 30 to 200 m^3 . The comfort display with plain text display offers user-friendly operation. The simple programming via keys and a large number of analogue and digital interfaces make it even more effortless to use. A plug-in converter mounted on the motor allows a space-saving design.

Product details:

Pump head:	max. 20 m
Flow rate:	max. 40 m^3/h
Strainer capacity approx:	ca. 6 l
Filter size:	920-1100 mm
Motor performance:	max. 2.20 kW

For detailed information on BADU Eco Flex, please visit our website at badu.de |
