

The feeling of boundless space ...

... in your own pool.

The premium counter swim units BADU JET Turbo and BADU JET Turbo Pro produced by SPECK Pumpen in the well-proven BADU quality **"Made in Germany"** offer an endless swimming experience without turns. The flow-optimised and efficient propeller technology creates an even, smooth, splash-free flow pattern and thus allows for a particularly close-to-nature swimming experience. **For a feeling just like in the open water.**

And you determine how strong the current should be. Entirely up to your individual preferences. Thanks to their **adjustable power** the BADU JET Turbo and BADU JET Turbo Pro premium counter swim units offer the best experience for everyone – no matter if you are a fan of wellness, swim as a hobby or to unwind after a busy day or are training for swimming competitions. For swimmers of all ages.

With a more compact design than the BADU JET Turbo Pro, the BADU JET Turbo is perfect for families, recovery training, and swimming as a hobby or to relax. The output of the BADU JET Turbo can be adjusted up to a maximum **flow rate of 245 m³/h** and controlled and specifically adjusted via a **remote control** or the **integrated piezo buttons**.

You want to train at competition level in your own pool?

The BADU JET Turbo Pro is your ideal training partner. The individual power control for a volume **flow rate of up to 350 m³/h** enables a professional performance-oriented workout under real and competition-like conditions.

Now possible: Swimming with ocean feeling

Saltwater pools are becoming more and more popular and water care with salt electrolysis is the latest trend. Therefore, in addition to **panels made of high-quality polished stainless steel** suitable for freshwater pools, there is now also a choice of **panels made of durable plastic in a brushed aluminium look** for the premium counter swim units BADU JET Turbo and BADU JET Turbo Pro. **In the saltwater version, the piezo buttons and the screws are also corrosion-resistant and made of high-quality V5A stainless steel.**

Experience a real ocean feeling in your own pool!

DESIGN & AESTHETICS

Because good design is not only a matter of personal taste, but also a statement of the owner.

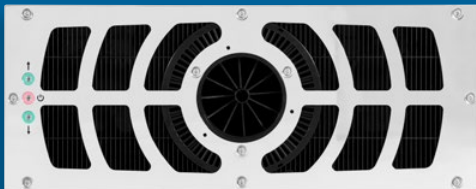

The poolside panels for the premium counter swim units BADU JET Turbo and BADU JET Turbo Pro are available in two different designs. The design panels seamlessly fit into exclusively designed pool installations without impairing the aesthetics or reducing the usable area of the pool.

The panels for freshwater pools are made of **high quality polished stainless steel**. For those who want to experience that ocean feeling at home with a saltwater pool, there is now a choice of panels made of **durable plastic in a brushed aluminium look** suitable for saltwater pools.

All panels have piezo buttons that can be used to control the power directly on the premium counter swim units, thus **additional installation work on the basin is no longer necessary**. Another highlight of the piezo buttons: They light up in a colour corresponding to the selected power, so you can identify the current setting out of the **7 different power levels** during swimming.

No matter if freshwater or saltwater design: The premium counter swim units BADU JET Turbo und BADU JET Turbo Pro upgrade every pool and offer an **endless swimming experience without turns**.

PROVEN SAFETY

The premium counter swim units BADU JET Turbo and BADU JET Turbo Pro are not only a real highlight in terms of design, they also shine in terms of safety: compliant with relevant **safety standards** (DIN EN 16582-1 & DIN EN 16713-2) and certified with the **GS seal* by TÜV**, they guarantee safe swimming fun for the whole family. They offer all the advantages not only in private pools for the whole family, but also for the swimmers in public swimming pools including hotel pools, therapy pools etc.

All **electrical components** of the BADU JET Turbo and BADU JET Turbo Pro are **hermetically separated from the pool water** so that no voltage can get into the pool. The sophisticated design of the suction opening ensures a very low suction speed and thus prevents hair or items of clothing from getting caught in the suction.

This makes the premium counter swim units BADU JET Turbo and BADU JET Turbo Pro **the safest on the market**. For swimmers of all ages.

*TÜV / GS certification marks applied for BADU JET Turbo and the saltwater version BADU JET Turbo and BADU JET Turbo Pro.

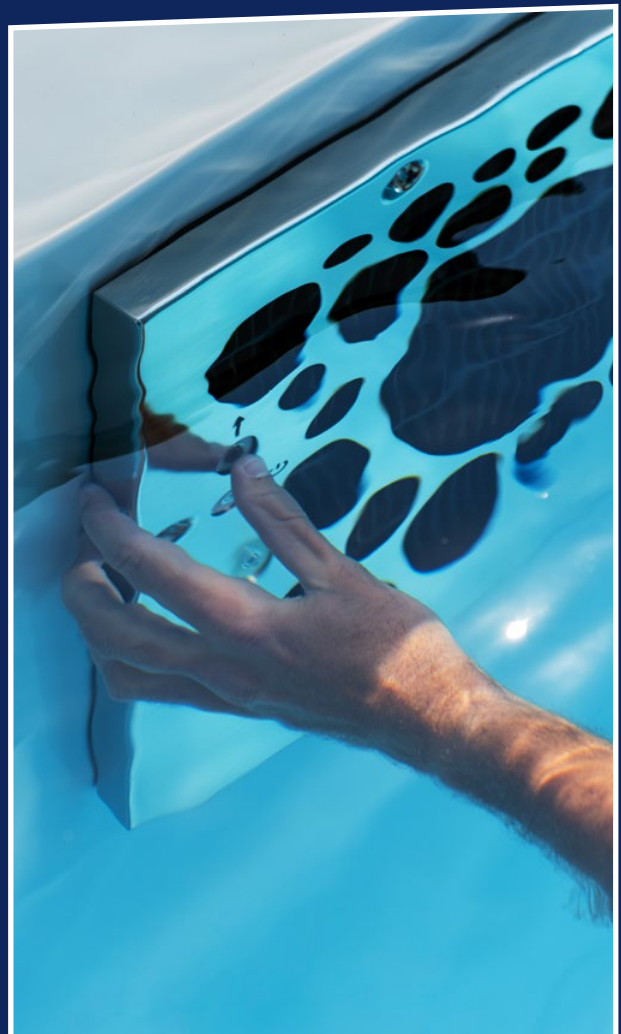

MAINTENANCE & OPERABILITY

Powered by a fanless, **high-efficiency permanent magnet motor**, the premium BADU JET Turbo and BADU JET Turbo Pro counter swim units ensure **energy-efficient operation** and long service life. The power is transmitted to the propeller via a contactless magnetic coupling. Without a continuous drive shaft and no dynamic seal, the design is **exceptionally low-wear**. It is also particularly **easy to maintain**, as the motor unit can be removed at any time in a simple and uncomplicated way **without having to lower the pool water**.

All housing and pump parts of the BADU JET Turbo and the BADU JET Turbo Pro are made of **technical plastic** which makes them absolutely corrosion-resistant. Another advantage of the material used is the **significant weight benefits combined with very good robustness**. This not only makes the handling during assembly easier, but also significantly **reduces the installation time**.

The nozzles of the BADU JET Turbo and the BADU JET Turbo Pro can be very easily set from the pool with the **special tool provided** so that the premium counter swim units and the water flow generated during operation can be **adjusted to your individual preferences**. No need for assembly work on the systems. This allows you to easily adjust the water flow to your individual preferences and always **guarantees the best conditions** – for breast-stroke or backstroke swimming and the crawl.

TRIAL SWIM
