

BADU[®] Eco Logic

Automatic timer with many extras.
Speed control for BADU GREEN pumps.

Field of application

Filter pump regulation for hard to reach engineering rooms. It regulates the filter times fully automatically whilst you relax and enjoy ideal water quality.

Performance characteristics

- Easily understandable full text display for convenient handling and multilingual menu.
- Simple menu for fast programming and evaluation of the operating hours.
- The control unit is equipped for individual programming with three switch programmes per day.
- The regulation of BADU GREEN pumps is carried out both via speed phases and with a control voltage of 0 to 10 V.

- An integrated additional relay allows the programming, for example, of your pool lighting.

Design

The BADU Eco Logic is constructed in an integrated switching technology.

Components:

- Electronic control unit with modern clamp connection technology.
- Sensors to display bathing water temperature (optionally available).

Article no	Description	Voltage
271.6606.000	BADU Eco Logic	1~ 230 V, 50/60 Hz
