

Stainless steel submersible pump TOP 71, Version D

The stainless steel submersible pumps from the TOP 71 range are especially suitable for handling clean, clouded or slightly contaminated water, for example swimming pool water, ground water, rainwater and clarified sludge. All wetted parts are made from stainless steel 1.4301. The non-return valve is included in delivery.

Details

Flow rate Q in m³/h: max. 10,20

Motor performance in kW (P2): 0,25

Total head H in m WS: max. 9

Field of application

- > Cellar drainage
- > Pump shaft drainage
- > Wastewater disposal
- > Handling rainwater
- > Handling ground water
