

# Metering pump V 600

With an optimal performance range of approx. 600 l/h, the V 600 non-self-priming metering pump offers one great advantage: the very low flow rate ensures the best possible safety for swimmers close to metering water priming points. The corrosion-resistant pump was specially developed for analysis of pool water in public swimming pools where pool water quality is subject to strict conditions.

## Details

Flow rate Q in m<sup>3</sup>/h: 0,65

Motor performance in kW (P2): 0,14

Total head H in m WS: 8

## Field of application

Metering pumps for continuous analysis of pool water in public swimming pools.

## Design

Centrifugal pump with peripheral impeller. Bellow-type mechanical seal mounted on a plastic impeller hub. Electrical separation.
