

BADU[®] Eco Logic

Automatic timer with many extras:

- > Easily understandable full text display for convenient handling and multilingual menu.
- > Simple menu for fast programming and evaluation of the operating hours.
- > The control unit is equipped for individual programming with three switch programmes per day.
- > The regulation of BADU GREEN pumps is carried out both via speed phases and with a control voltage of 0-10 V.
- > Can be connected to the BADU EasyTronic.
- > An integrated additional relay allows the programming, for example, of your pool lighting.

Details

Class: GREEN

Extras: Poolwassererwärmung

Pool equipment: Control units

Field of application

Filter pump regulation for hard to reach engineering rooms. It regulates the filter times fully

automatically whilst you relax and enjoy ideal water quality.

Miscellaneous

The new pool controllers regulate the filter times as well as the heating and solar heating of swimming pool water fully automatically whilst you relax and enjoy an ideal water temperature. Depending on the type, the controller regulates further fundamental parameters of your unit.

- Simple installation and fast troubleshooting thanks to installation assistant and help menu.
- Easily understandable full text display and multi-lingual menu.
- Clear graphic display of the swimming pool system.
- Usage display and efficiency testing with optimal third temperature sensor.
- With the BADU Logic 3 the unit can be monitored on smartphones or tablets via an optional webmanager and various parameters can be regulated.
