

Cistern pump ZIS 40/10 WES

The borehole pumps from the ZIS range are used for rainwater utilization and irrigation. They distinguish themselves through their easy installation and minimum noise pollution. Wetted parts are made from corrosion-resistant materials. An extensive range of accessories are available.

Details

Flow rate Q in m³/h: max. 4,80

Motor performance in kW (P2): 0,75
Total head H in m WS: max. 60

Field of application

Irrigation

Design

Motor with built-in thermal overload protection. Wired ready for connection with 15 m cable and shock proof plug.
