

Multistage ring section pump ES 400

These multistage, non-self-priming boiler feed pumps are used for water applications with a large flow rate and at the same time a high counter pressure e.g. in boiler feed units or in water supply units.

Details

Flow rate Q in m^3/h : max. 40

Motor performance in kW (P2): 7,50 - 55

Total head H in m WS:
