

Radial impeller pump MY-3-MM

These non-self-priming centrifugal pumps with electronically commutated direct current motor, in a canned motor version, are maintenance-free and can be set to various motor speeds. These can be applied for example in cooling circuits and in air-conditioning units in cars.

Details

Flow rate Q in l/min: max. 100

Motor performance in kW (P2): 0,18

Total head H in m WS: max. 14
