

SPR-E 110

Details

Motor performance in kW (P2): 11,00

Field of application

- Water supply
- Cooling circuit
- Irrigation
- Industrial applications

Design

The pump is adjusted to the system perfectly with the SPR-E speed control. The pump control is available with the following types of control:

- constant pressure control
- temperature control

- level control
- vacuum control

The SPR-E speed control can be assembled in control boxes on site or on the wall. The speed control is available up to 30 kW. Larger kW values available on request.

The speed control is equipped with a clear text display, PTC thermistor connection, operation selection buttons, repair switch and interface relays. The system is parameterised in the factory.
