SPR-I 022

Details

Motor performance in kW (P2): 1,10

Field of application

- Water supply
- Cooling circuit
- Irrigation
- Industrial applications

Design

The pump is adjusted to the system perfectly with the SPR-I speed control. The pump control is available with the following types of control:

- constant pressure control
- temperature control
- level control
- vacuum control

The SPR-I speed control can be adapted directly on the motor (only with IN-VB pumps). The speed controls are equipped with a clear text display, PTC thermistor connection and keyboard. The system is parameterised in the factory.
