

# Universal opening device, PP

SPECK Pumpen supplies practical opening devices for the BADU swimming pool circulation pumps. Toggle screws or cap nuts, partly exposed to corrosion, are therefore a thing of the past. The strainer tank lid can be opened easily with just one handle. There are three different universal opening aids, which cover the whole range of product types in the BADU series. The universal opening device is attached to the pre-filter lid from above. It is then attached to the lid between the corresponding cams until it locks into place with the threaded ring. Following on from that it is turned in an anti-clockwise direction to release the lid. The opening aid is designed for the BADU Eco Touch, BADU Eco Touch-pro, BADU 90 and BADU Bronze.
