

Vacuum pump VHC-500 / 600

These liquid ring vacuum pumps are two-stage pumps without valve technology. The tried and tested, robust construction is one of the benefits. These pumps are applied in distillation and degassing units.

Details

Flow rate Q in m^3/h : max. 616

Motor performance in kW (P2): 15 - 18,5

Suction pressure in mbar: max. 33
