

Vacuum pump VZ-110 / 140 / 180 - G

These liquid ring vacuum pumps are two-stage pumps without valve technology, in a low-noise construction. Special edition pumps with a maintenance-free magnetic coupling are also available. These pumps are applied in sterilisers and degassing units, among others.

Details

Flow rate Q in m^3/h : max. 186

Motor performance in kW (P2): 3,00 - 5,50

Suction pressure in mbar: max. 33
