

Multipurpose pump SG-DA 201

The fully-automatic small booster units SG(M)-DA 101 and SG(M)-DA 201 with three phase and single phase motors are ideal all-purpose waterworks pumps with many application possibilities:

- Ideal as a garden hose pipe
- Multiple applications in shipping
- Rainwater utilization

The unit is approved for suction operation or rather for indirect connection via a non-pressurised feed tank. For suction operation, for example from wells, cisterns and rainwater collection tanks, a foot valve is installed in the suction line.

Scope of delivery:

Unit complete with self-priming, stainless steel pump, 20 l stainless steel membrane vessel, pressure switch and pressure gauge.

- Unit with single phase motor, with motor protection, including 1.5 m cable and shock proof plug.
- Unit with three phase motor, without motor protection (to be provided on site), without cable, without plug.

Details

Flow rate Q in m³/h: max. 4

Motor performance in kW (P2): 0,88

Total head H in m WS: max. 50

Field of application

Rainwater utilisation

Miscellaneous

Special voltages
