

Vacuum pump VH-300 / 350 /400

These liquid ring vacuum pumps are two-stage pumps without valve technology. The tried and tested, robust construction is one of the benefits. These pumps are applied in distillation and degassing units.

Details

Flow rate Q in m^3/h : max. 425

Motor performance in kW (P2): 7,50 - 15

Suction pressure in mbar: max. 33
